CERTIFICATE OF ANALYSIS

Number and date of issue: RN28159 / 15 Sept 2020

Application for testing №: RN28159 / 04 Sept 2020

Period of conducting the tests 11 Sept 2020 r. to 14 Sept 2020

Client:	
Test object:	System, model Retail X, serial #20202800003, working under the technology with models: Dental, Jewelry, Hairdressing, Textile cabinet, Home and office set, I-box virus protection set, Portable set
Scope of tests:	Inoculation (contamination) of pre-sterilized samples of fabric, metal and plastic with a known number of microorganisms from the following strains: Staphylococcus aureus ATCC 6538, Pseudomonas aeruginosa ATCC 9027, Escherichia coli K 12, Candida albicans ATCC 10231, Aspergillus niger 16404. The inoculated samples of fabric, metal and plastic were placed in the Toruko system for an 8 minute cycle, after which the degree of reduction of microorganisms was reported. Expression of results in% for greater accuracy
Conclusion:	After the 8 minutes cycle in the closed system, model Retail X, serial #20202800003, where a pre-sterilized samples of fabric, metal and plastic were placed, inoculated with a known number of microorganisms from the following strains: Staphylococcus aureus ATCC 6538, Pseudomonas aeruginosa ATCC 9027, Escherichia coli K 12, Candida albicans ATCC 10231, Aspergillus niger ATCC 16404, a degree of reduction from 99.99562% to 100% inclusive is reported in the different samples, as shown in Table 1.
Study performed by:	Ms.Tanya Pancheva, Ph.D., microbiologist, Department manager "Microbiological analyses" at Testing center "GLOBALTEST"

Table 1

Degree of reduction %	Staphylococcus aureus ATCC 6538	Pseudomonas aeruginosa ATCC 9027	Escherichia coli ATCC 8739	Candida albicans ATCC 10231	Aspergillus niger ATCC 16404
Fabric	99.99951	99.99998	99.99921	99.99936	99.99731
Metal	100.00000	100.00000	99.99921	99.99962	99.99562
Plastic	99.99960	99.99993	99.99921	NA	NA

Acceptance criteria:		Calculated range of variation < Theoretical range of variation							

NOTE: Test results are for the test sample only; The test report may only be used in its entirety; The laboratory does not commit itself to the reliability of the data submitted by the applicant and the representativeness of the sample submitted for testing. This CoA is issued electronically.

Materials:

Test	Inoculation with 0.1ml 10 ⁸ 10 ⁷ cfu test MO/ material
Materials used:	Fabric, Metal, Plastic – pre-sterilized
1.	The surface of the material is contaminated with a control suspension, with a known concentration of the control microorganism
2.	The material is irradiated in the device in one cycle
3.	The material is immersed and washed with 100 ml of sterile solvent, leaving the remaining number of microorganisms in the solvent.
4.	The residual number of microorganisms on the material was determined by a membrane filtration method, filtering the entire amount of solvent through a cellulose-nitrate filter with a pore size of 0,45 µm
5.	The filters were placed by aseptic technique on petri suitable for control microorganisms with sterile media, after which the petri were thermostated at suitable periods and temperatures suitable for the development of microorganisms.
6.	The number of microorganisms on the used filters was determined

Start date: 11 Sept 2020 – End date: 14 Sept 2020

Dilution, d	Fabric		Metal		Plastica	
Reported	cfu/ petri		cfu/ petri		cfu/ petri	
Staphylococcus aureus		101		0		82
Pseudomonas aeruginosa		3		0		9
Escherichia coli	>	150	>	150	>	150
Candida albicans		46		27		NA
Aspergillus brasiliensis		43		70		NA

NOTE: Test results are for the test sample only; The test report may only be used in its entirety; The laboratory does not commit itself to the reliability of the data submitted by the applicant and the representativeness of the sample submitted for testing. This CoA is issued electronically.

Reduction:

Test MO	Inoculated cfu on material (cfu/0.1 ml)	Content of viable microorganisms on the material			Log reduction		
		Fabric	Metal	Plastic	Fabric	Metal	Plastic
Staphylococcus aureus	20,700,000	101	0	82	5.3	7.3	5.402156
Pseudomonas aeruginosa	12,600,000	3	0	9	6.6	7.1	6.146128
